

## *A Message from the President*

**D**elaware Technical & Community College is a statewide institution of higher learning where all students have an opportunity to reach their goals and potential. Several factors make Delaware Tech an outstanding college—excellent programs, expanded course offerings, high quality instruction and a commitment to serving our students and our business community.

Campuses in all three counties provide programs of instruction that are career relevant, and our faculty members are dedicated professionals who are well versed in their fields. The College's commitment to technology and multi-access education is evidenced by an expansion of distance learning and on-line courses, and integration of technology in the classroom. We embrace this use of technology to support the learning process while continuing to maintain the personal interaction so important to the success of our students. Students entering college for the first time and those seeking to finish their degrees find a great deal of support and encouragement as they pursue studies at any of our four campus locations.

Your decision to attend college is a commitment to your future. I assure you that our faculty and staff will help you gain the education you need in order to succeed, not only at Delaware Tech, but in your chosen profession as well.

On behalf of the entire College community, I extend our best wishes for a rewarding educational experience.

Sincerely,

**Orlando J. George, Jr.**  
President

**Dr. Orlando J. George, Jr.**
