

Student Advisory of Social Security Number Self-Disclosure Requirement for Clinical

The Delaware Technical & Community College, Stanton Campus Associate Degree Nursing Program provides multiple learning opportunities through a balance of general education courses, nursing courses and supervised clinical practice. In order to participate in supervised clinical practice, students must meet specific requirements established by the healthcare facilities. One of these clinical requirements is that students self-disclose their social security numbers. Students who are unable to meet this requirement will not be able to participate in clinical experiences at that facility, and therefore, will be unable to meet the clinical objectives of the nursing course.

I understand that I will be asked by healthcare facilities used for supervised clinical practice to self-disclose my social security number. If I am unable to do so, I will not be permitted by the healthcare facility to attend the supervised clinical experiences at the healthcare facility; and therefore, will be unable to meet the clinical objectives of the course.
