

## Parents

The Delaware Tech community of faculty and staff understand the importance of every student's safety when traveling abroad. Course locations and structure are developed by faculty members who have knowledge of each location, and who are personally vetted through an extensive development and approval process. No course is developed until the College deems the course content and location to be safe and educationally enriching for students.

For many students, this adventure is their first endeavor out into the international community. The safety and security of students is our first priority. The College does not offer courses to countries, regions, or destinations where there is a current U.S. Department of State Travel Warning. Faculty and administrators closely monitor State Department advisories regarding international events.
