Automotive Technology

STANTON CAMPUS

Spring 2020

The Automotive Technology program allows students to select a practical hands-on diploma program or a more rigorous associate degree option.

Graduates of the associate degree option performs a variety of preventive maintenance and repair functions on automobiles. Through systematic classroom instruction, completion of required laboratories and structured, mandatory internships, graduates use printed and electronic information, tools, and instruments to diagnose faults and carry out necessary repairs and maintenance procedures.

Graduates of the diploma program enter the automotive service industry as entry level technicians. Through the completion of the required pre-tech courses, students completing the diploma program may transfer their earned credits toward the associate degree program. Academically ready students can apply to the program following the guidelines of each location's wait-list process. Interested applicants should review the information provided here and contact their program advisor for program requirements.

*To complete program requirements, you must pass the above courses and earn at least **69 credits**. The number of courses and credits required for graduation may be more depending on your need for developmental education courses and the elective choices you make (if electives are a part of the program). Some programs also have college-level courses that you must take if you do not score at a certain level on the College Placement Test. If this applies to your program, the courses are listed at the top of the sequence sheet before the first semester of the course list.*
