

## Education

### Science Education: Chemistry/Physics

OWENS CAMPUS

Spring 2020

The Science Education program will use the resources of Delaware Tech's programs and faculty in the mathematics, education, science, English, and social science departments. Technology is infused within each of the general education areas. The major electives and physics course selections allow students to complete courses that articulate to a physics or chemistry bachelor degree program.

*To complete program requirements, you must pass the above courses and earn at least **65 credits**. The number of courses and credits required for graduation may be more depending on your need for developmental education courses and the elective choices you make (if electives are a part of the program). Some programs also have college-level courses that you must take if you do not score at a certain level on the College Placement Test. If this applies to your program, the courses are listed at the top of the sequence sheet before the first semester of the course list.*
