Electronics Engineering Technology Transfer Option

OWENS CAMPUS

Spring 2020

The Electronics Engineering Technology Transfer Program prepares students for transfer to a baccalaureate electronics engineering technology program. Rigorous mathematics and physics instruction as well as hands-on laboratory training in analog and digital electronics, microprocessors, computers and programmable logic controllers provide students the foundational skills necessary for a successful transfer to a four year institution.

PROGRAM SPECIFIC ADVISEMENT STATEMENT

Students planning to transfer to Delaware State University should take ELC 283, Introduction to LabView. Students planning to transfer to University of Maryland Eastern Shore should take ELC 236, Analog Electronics III. PHY 281 and PHY 282 are required for transfer to DeVry University. PHY 281 and PHY 282 required for transfer to DeVry University.

*To complete program requirements, you must pass the above courses and earn at least **68 credits**. The number of courses and credits required for graduation may be more depending on your need for developmental education courses and the elective choices you make (if electives are a part of the program). Some programs also have college-level courses that you must take if you do not score at a certain level on the College Placement Test. If this applies to your program, the courses are listed at the top of the sequence sheet before the first semester of the course list.*
