

Manufacturing Technician

Certificate Program - Training That Works

Job-ready in in just five weeks.

Delaware businesses need trained technicians.

With an increased focus on energy efficiency, businesses statewide are looking for production technicians and machine equipment operators to help them reduce their energy use, save money, and get the highest performance from vital equipment. Delaware Tech's new Manufacturing Technician certificate program is a full-time, five-week training program at the College's recently-renovated Innovation and Technology Center in New Castle, DE. In just 5 weeks you will learn prep math, precision measurement, hand and power tools, torque specs, blueprint reading, mechanical systems, electricity and more.

Enroll today!

- » 2013 Sessions starting July 22 and October 22.
- » Learn from highly-qualified instructors using new state-of-the-art simulators.
- » Be prepared to work in only five weeks.
- » Tuition assistance may be available to qualified applicants.
