

# Renewable Energy - Solar

## Associate Degree Program

### Be Part of the Growing Solar Industry

#### Why Solar?

With recent advancements in solar technology and greater financial incentives, many builders, homeowners and businesses are considering using solar energy. The solar industry is expected to grow by 15% through 2018, according to the Bureau of Labor Statistics. In Delaware, aggressive renewable energy portfolio standards will further the growth of the solar industry, and by 2025, 25% of all electricity in the state will come from renewable sources, including solar and wind.

Delaware Tech has responded with a two-year degree in Renewable Energy – Solar that will prepare you with the skills and knowledge to sell and install photovoltaic and solar thermal hot water systems as well as perform site design. Graduates are qualified to create cost estimates, as well as assemble and build systems at both commercial and residential sites.

#### Graduates are in demand to provide

- » Solar design
- » Site assessment
- » Photovoltaic Systems Installation
- » Solar Thermal Installation
