

**Delaware Technical Community College
Radiologic Technology Program
Wilmington Campus**

Mission Statement

The Radiologic Technology Program provides comprehensive, educational experiences that enable qualified students to acquire the knowledge, skills and behaviors necessary to be eligible for certification by the American Registry of Radiologic Technologists (ARRT) and employment as radiologic technologists.

Reviewed 5/2021

Program Goals and Student Learning Outcomes

Students will demonstrate clinical competence.

- Students will accurately position patients for radiographic exams.
- Students will select correct technical factors.
- Students will protect patients from unnecessary radiation exposure.
- Students will demonstrate good patient care skills during the performance of radiographic procedures.

Students will communicate effectively.

- Students will effectively communicate directions during the performance of radiographic procedures.
- Students will recognize the need to modify communication when interacting with patients of a different culture.

Students will utilize critical thinking.

- Students will be able to adapt to non-routine procedures.
- Students will apply critical thinking in the evaluation of radiographic images.

Students will demonstrate professionalism.

- Students will exhibit professional behavior in the clinical setting.
- Students will practice ethical conduct.
